- b. The Company entered into an 8% Redeemable Convertible Debenture with Hunter Dickinson Group Inc. ("HDGI") in order to finance the Company's investment in the Precious Exploration Limited Partnership ("PELP"). The Debenture was secured by the Company's interest in PELP. The loan was due December 31, 2002 unless the Company did not exercise its option to participate in the 2002 exploration program on or before January 31, 2002 and pay the promotion fee of \$250,000, the total amount of the loan plus accrued interest was due immediately.

In January, 2002, the management of the Company resolved not to exercise its option, and the Company relinquished its interest in PELP and the loan was converted into 7,000,000 common shares.

Events During the Quarter Ended March 31, 2002

Description of Business

Expatriate is in the business of exploration and development of mineral deposits in Canada and South America. Expatriate, through its subsidiary Nitrosyl Technologies Corporation, also has interests in metal leaching and sulphur technologies that may provide strategic benefit to the development of its mineral properties.

Discussion of Operations

Finlayson Project, Yukon

With the return of the Kudz Ze Kayah property to Teck Cominco Limited in September 2001 the Finlayson Project is reduced to Expatriate's interest in the 705 claims comprising Wolverine Joint Venture and its approximate 2830 wholly owned mineral claims within the Finlayson District in southeast Yukon.

Atna Resources Ltd. did not participate in the 2001 program for the Wolverine Joint Venture and has undergone modest dilution of its interest. Expatriate's working interest in the joint venture has increased to approximately 60.6%. Expatriate has proposed a program of \$44,000 for 2002 consisting mainly of claim maintenance and related activities. Atna has also elected not to participate in the 2002 program and will undergo minor dilution as result of these expenditures.

Fox River Project, Manitoba

On January 28, 2002, Expatriate informed Amarc Resources Ltd. that it was not going to participate in the 2002 program or continue as a participant in the Precious Exploration Limited Partnership ("PELP") (see February 1, 2002 news release). Expatriate also informed Hunter Dickinson Group Inc. (HDGI) that it was relinquishing its interest in the PELP and not going to pay the \$250,000 participation fee due January 31, 2002 and that it wished to exercise its option to have the \$1,300,000 convertible debenture issued to HDGI settled by issuance of 7,000,000 common shares of Expatriate. These shares were delivered to HDGI on February 8, 2002, settling all indebtedness to HDGI.

EXPATRIATE RESOURCES LTD.
MARCH 31, 2002

Isleña Project, Chile

Expatriate resumed exploration on its Isleña property in coastal Chile (see February 13, 2002 press release). Follow up soil sampling on the Atacama West target area extended the anomaly over a 1600 metre length of the Atacama Fault (see April 1, 2002 news release). Expatriate undertook 770 metres of backhoe trenching over the area of the induced polarization chargeability anomaly. Sampling of surface material in this area had yielded assays up to 59 g/t gold in hand samples; 6 of 13 samples of the quartz breccia material assayed more than 10 g/t gold (see May 11, 2000 news release) and soil sampling had defined anomalous gold in soil samples to a maximum value of 140 ppb gold. Trenching to bedrock has exposed several narrow hematite-manganese-barite zones that appear to correspond with the narrow high chargeability anomaly found in an induced polarization survey completed in 2000.

Eureka Joint Venture, Yukon

The Eureka Joint Venture, consisting of 50% Expatriate and 50% Strategic Metals Ltd., completed an option agreement with Viceroy Resource Corporation on the joint venture's 164 claim Eureka property. The property is located 60 kilometres southeast of Dawson City in the southwest portion of the Klondike Goldfields (see March 1, 2002 news release).

Viceroy may earn an initial 50% interest by completing \$900,000 in exploration expenditures over four years and making cash payments totalling \$40,000. Viceroy shall have a second option to increase its interest to 65% by making an additional \$600,000 of exploration expenditures on the property or enter into a joint venture to continue exploration and development of the property. Viceroy made an initial payment of \$5,000 on signing and shall make an additional payment of \$5,000 on or before July 1, 2002 and commit to a minimum \$100,000 program of exploration in 2002.

Regal Ridge Emerald Property, Yukon

Expatriate concluded an agreement with True North Gems Inc. ("True North") for the sale of Expatriate's interest in the 93 claim Regal Ridge Emerald property in the Finlayson Lake District (see March 6, 2002 news release). The sale of its interest will provide Expatriate additional money for its 2002 exploration program and the opportunity to acquire a direct equity interest in True North upon its completion of an initial public offering of its shares.

Under the sale agreement, Expatriate will receive an aggregate consideration of \$500,000, consisting of an initial cash payment of \$25,000 that was paid on receipt of regulatory acceptance and \$75,000 that was paid before March 31, 2002; \$100,000 on the earlier of Initial Public Offering (IPO) and August 1, 2002; and an additional \$100,000 payment on the earlier of IPO or March 7, 2003. The remaining \$200,000 shall be payable in True North Units at the share price in the IPO or by the issuance to Expatriate of a Convertible Special Note that automatically converts at the IPO share price. The True North Units shall consist of one common share and one common share purchase warrant with the conversion to be on the same terms as for similar shares in the IPO being contemplated by True North.

**EXPATRIATE RESOURCES LTD.
MARCH 31, 2002**

Expatriate retains the right to explore for precious and base metals on the Regal Ridge Emerald Property under an Access Rights Agreement with True North. The claims comprising the Regal Ridge property are part of Expatriate's large Goal Net property and have potential to host copper-rich Besshi type massive sulphide deposits.

Acquisition of Falconbridge Limited Copper Projects in Chile

Expatriate has completed the acquisition of three copper properties in Chile from Falconbridge Limited (see March 12, 2002 news release). The three properties are located in the Central Porphyry Copper Belt where Expatriate, through its wholly owned subsidiary Compañía Minera Latina Ltda., has been exploring for oxide and sulphide copper deposits for the past several years. Expatriate issued Falconbridge 150,000 of its common shares, and granted it a Back-in Option in respect of each of the properties. The Back-in Option shall give Falconbridge the right to back in to a 50% participating interest in a joint venture for the exploration and development of the properties by incurring exploration and development expenditures on the Back-in Property equal to 250% of Expatriate's expenditures thereon. If Expatriate seeks to joint venture one or more of the properties, Falconbridge will have a first right of opportunity to negotiate an option and joint venture agreement for each property. If Expatriate is not able to reach agreement with Falconbridge on the terms of an option and joint venture, and enters into an option and joint venture with a third party, then the Back-in Option shall be amended. The amended Back-in Option shall give Falconbridge the right to back-in to 50% of Expatriate's participating interest therein.

Canalask Property, Yukon

Uravan Minerals Inc ("Uravan") will earn a 50% interest in Expatriate's Canalask property in the Kluane District in southwest Yukon by making aggregate expenditures of \$1.2 million (see Subsequent Events).

Geophysical surveys and geochemical sampling have defined two areas with strong electromagnetic response and nickel-copper-cobalt-platinum group element mineralization. The geophysical anomalies are interpreted to define embayments in the footwall of an ultramafic sill. The two areas of the anomalies cover 800 and 1100 metres of the more than 5000 metre long sill structure (see Uravan October 31, 2001 news release).

Uravan has made aggregate expenditures of approximately \$320,000 and is required to make aggregate expenditures of \$ 700,000 by August 1, 2002 to maintain its option to earn a minimum 50% interest in the Canalask property. Uravan recently completed a financing for \$500,000 with use of proceeds designated to the Canalask Project.

Corporate Activities

Financing

In early January 2002, Expatriate closed the \$100,000 private placement announced in December 2001 (see December 31, 2001 news release).

EXPATRIATE RESOURCES LTD.
MARCH 31, 2002

Expatriate completed the \$700,000 financing with Resource Investment Trust PLC of the United Kingdom in late January, 2002 (see December 13, 2001 news release). Expatriate acquired 309,287 shares of the Resource Investment Trust at a price of £1 per share by issuance to it of 7,000,000 units of Expatriate at a price of \$0.10 per unit. Each unit consists of one common share and one half of a non-transferable share purchase warrant, with each full warrant entitling the holder to purchase an additional common share at \$0.12 per share for two years. The 3.5 million warrants are exercisable through December 19, 2003.

Two private placements totalling \$143,000 were negotiated in February (see February 7, 2002 news release). A \$53,000 flow-through private placement consisted of 132,500 units at a price of \$0.40 per unit. Each flow-through unit consisted of three flow-through shares, one common share and one non-transferable share purchase warrant, with each warrant entitling the holder to purchase an additional common share at a price of \$0.12 for one year from closing. A \$90,000 private placement consisted of 900,000 units at a price of \$0.10 per unit. Each unit consisted of one common share and one non-transferable share purchase warrant, with each warrant entitling the holder to purchase an additional common share for one year from closing. Mr. McKnight is a graduate of the University of British Columbia with a degree in Geological Engineering. He has broad experience in the mining industry and is currently employed as an independent consulting engineer offering services in feasibility studies, financial evaluations, technical and financial due diligence, project finance and mergers and acquisitions. Mr. McKnight participated in the prefeasibility study on the Finalyson Project. His familiarity with the Finlayson Project is an added benefit to Expatriate.

The Compensation Committee met in February 2002 and approved an increase in salary of the President from \$7390 per month to \$8390 per month. In addition, the Committee approved two years salary compensation for the President of the company in the event that his employment shall materially change as a result of a change of control of the Company.

See Subsequent Events for issuance of additional shares, warrants and options after March 31, 2002.

Expatriate has made application for \$325,101 of recoverable tax credit under Yukon Mineral Exploration Tax Credit (YMETC) program in respect of eligible exploration expenditures made in the Yukon during 2001. This compares with \$478,108 received for 2000. The recovery of the YMETC is expected to occur in July 2002. The YMETC program remains in effect for 2002; Expatriate may claim a tax credit for up to 25% of eligible exploration expenditures in 2002. An additional \$15,938 of YMETC has been accrued in the first quarter.

Expatriate has sufficient working capital to meet its short-term requirements. It intends to raise additional equity capital during 2002 to cover exploration expenditures and to maintain its working capital position and meet any debt obligations falling due (See Subsequent Events for sale of Resource Investment Trust shares).

Expatriate has obligations to incur \$109,013 of exploration expenditures eligible for Canadian Exploration Expense to fulfill its flow-through share obligations before December 31, 2002. Expatriate nearly fulfilled these obligations and plans to make sufficient eligible exploration expenditures during the second quarter to fulfill them.

There is no assurance that Expatriate can reasonably sell its marketable securities as markets for all of the securities Expatriate wishes to sell may not be readily available. Similarly, market conditions remain difficult and raising additional capital to meet the needs of Expatriate over the long term remains uncertain.

Current liabilities were \$633,839 at March 31, 2002 compared with \$1,980,867 at December 31, 2001. The large decline in current liabilities during the period is due to the conversion of \$1,300,000 of convertible debenture into 7 million common shares of Expatriate. Blue Moon provides Expatriate an attractive small mine development opportunity that may be enhanced by discovery of additional ores as exploration is renewed. The location and excellent infrastructure provide opportunity for low capital and operating costs in development of the deposit. Expatriate plans to undertake a review of the data and resume exploration. It also plans to re-evaluate the production plan for the deposit and formulate a plan for its development.

Completion of the acquisition is expected to take several months to effect the transfer of non-Blue Moon assets out of Westmin Resources Inc. and registration of the change in ownership
